

CONCENTRICS

As the leading manufacturer of Concentric Diffusers for the past 30 years, Ruskin Rooftop Systems offers a cost effective way of distributing air in a simple and practical manner. Ruskin Rooftop Systems is the only manufacturer that provides a supply duct through return air transition, allowing even air flow on all four sides of the diffuser — this supply through transition offers 25% better air flow than the competition.

25% BETTER AIR FLOW

Concentric Diffuser Selection Tool

Ruskin Rooftop Systems Concentric Diffuser Selection Tool helps you select the model and size of the concentric diffuser needed for your next job. Concentric Diffusers allow you to minimize your duct runs and eliminate multiple registers by integrating both supply and return air for an easy commercial installation.

510 & 515 Series

FLUSH MOUNT CONCENTRIC DIFFUSER SYSTEM WITH FILTER GRILL

Light Commercial 'T' Bar Ceiling

Light Commercial Plaster Ceiling

RRS's 510 & 515 SERIES concentric diffuser systems are designed to provide a single point air distribution system. The systems may be used with either a "T-Bar" ceiling or a plaster ceiling.

515 series — same as the 510 series, with an additional 4" fiberglass filter in the return section.

Standard features include:

- All anodized aluminum diffuser frame with aluminum return air egg crate.
- Built-in Anti-Sweat gasket.
- Molded Fiberglass Core (thru five tons).
- Built-in hanging supports.
- Diffuser box constructed of fiberglass ductboard (thru 7.5 tons) or sheetmetal.
- Stainless steel thumb screws.

Standard benefits include:

- Even four (4) way air distribution
- Lightweight design.
- Factory assembled and sealed.
- Guaranteed not to "sweat".
- Guaranteed not to recirculate airflow (short cycle).
- Return air eggcrate is easily removed.
- Units are fully insulated (both supply and return).

510 & 515 Series

Typical specifications

Furnish and install Ruskin Rooftop Systems “510 & 515 SERIES” concentric diffuser systems. The system shall consist of an aluminum supply diffuser with an aluminum eggcrate return. It shall also have a permanent (not adhesive) anti-sweat gasket and hanging supports. All units that are five (5) tons and smaller shall have a molded fiberglass interior transition.

	13000	1.10	62-75	927	1958	40	244.00

- All data is based on the Air Diffusion Council guidelines.
- Throw data is based on Terminal Velocities of 75 FPM using isothermal air.
- "Neck Velocity" is the speed in feet per minute of the air coming into the diffusers – similar to duct velocity.*
- "Jet Velocity" is the speed in feet per minute of the air exiting the diffusers.*
- Actual noise levels are less than those shown.

* Jet velocity is higher than neck velocity on the (510) flush mount diffusers because the air gets "pinched down" as it exits – similar to high pressure water coming out of a garden hose with a sprayer.

The drop down (530) diffusers have enough face area in the supply grills so that the air velocity does not increase significantly as it exits the concentric. That is why "Neck Velocity" and "Jet Velocity" are the same for the drop downs.

530 & 535 Series

Light Commercial Plaster Ceiling

Commercial 'T' Bar Ceiling

Open Ceiling

RRS's 530 & 535 SERIES concentric diffuser systems are designed to provide a single point air distribution system with the added benefit of having directional air control. The systems may be used with either a "T-Bar" ceiling, a plaster ceiling, or with no ceiling at all.

535 Series — Same as the 530 series, with an additional 1" Hogs Hair filter in the return section.

Standard features include:

- All anodized aluminum diffuser frame with aluminum return air egg crate.
- Double deflection diffuser with the blades secured by spring steel.
- Built-in Anti-Sweat gasket.
- Molded Fiberglass Transition (thru five tons).
- Built-in hanging supports.
- Diffuser box constructed of fiberglass ductboard (thru 7.5 tons) or sheetmetal.
- Stainless steel thumb screws.

Standard benefits include:

- Even four (4) way air distribution.
- All exposed surfaces (below ceiling) are brushed aluminum.
- Factory assembled and sealed.
- Guaranteed not to "sweat".
- Guaranteed not to recirculate airflow (short cycle).
- Return air eggcrate is easily removed.
- Units are fully insulated (both supply and return).
- Lightweight design.

SIDE DISCHARGE CONCENTRIC DIFFUSER SYSTEM WITH FILTER GRILL

Typical specifications

Furnish and install Ruskin Rooftop Systems **"530 & 535 SERIES"** concentric diffuser systems. The system shall consist of an aluminum double deflection supply diffuser with an aluminum eggcrate return. ALL EXPOSED SURFACES (BELOW CEILING) MUST BE BRUSHED ALUMINUM. It shall also have a permanent (not adhesive) anti-sweat gasket and hanging supports. All units that are five (5) tons and smaller shall have a molded fiberglass interior transition.

570 & 575 Series

SPECIALTY DIFFUSER SYSTEMS FOR OPEN CEILING APPLICATIONS

RRS's 570 SERIES

DOUBLE DEFLECTION SUPPLY DIFFUSERS

RRS's 570 SERIES supply diffuser systems are designed to provide an air distribution system with the benefit of having directional air control. The system is ideal for open ceiling applications that need single point supply air with control over where the air is distributed.

Standard features include:

- All aluminum diffuser.
- Double deflection diffuser with blades secured with spring steel.
- Internal air deflector for quiet operation and low static.
- Optional Duct Cap Accessory.
- Built in hanging supports in Duct Cap Accessory.

Typical specifications

Furnish and install Ruskin Rooftop Systems "570 Series" Supply diffuser systems. The system shall consist of an extruded aluminum frame, aluminum **double deflection** supply diffusers, a 20 gauge galvanized steel bottom panel powder painted to match the aluminum extrusion and an insulated internal transition to ensure quiet, even airflow.

Furnish and install Ruskin Rooftop Systems "570 Series with a Duct Cap Accessory." The system shall consist of aluminum **double deflection** supply diffusers, an internal transition to ensure quiet, even airflow, and an insulated duct cap designed to mate with the diffuser. Hanging supports will be provided with the duct.

RRS's 575 SERIES

DRUM LOUVER DIFFUSERS

RRS's 575 SERIES supply diffuser systems are designed to provide an air distribution system with the benefit of having directional air control. The system is ideal for open ceiling applications that need single point supply air with long throws. The Drum Louver allows you to "spot" the air where you need it the most.

Standard features include:

- All aluminum diffuser.
- Drum Louver diffusers for installations that are high above the floor.
- Internal air deflector for quiet operation and low static.
- Optional Duct Cap Accessory.
- Built in hanging supports in Duct Cap Accessory.

Typical specifications

Furnish and install Ruskin Rooftop Systems "575 Series" Supply diffuser systems. The system shall consist of aluminum **drum louver** supply diffusers, and incorporate an internal transition to ensure quiet, even airflow.

Furnish and install Ruskin Rooftop Systems "575 Series with a Duct Cap Accessory." The system shall consist of aluminum **drum louver** supply diffusers, an internal transition to ensure quiet, even airflow, and an insulated duct cap designed to mate with the diffuser. Hanging supports will be provided with the duct cap.
